Qwik-Fuse MPO connectors

The CommScope QWIK-Fuse MPO connector utilizes mass-fusionsplicing connectivity to facilitate rapid repairs, restorations, and upgrades to multi-fiber cable assemblies. They offer a reliable alternative when factory-terminated MPO solutions cannot be used, such as when high-fiber count cables are being fed through tight conduits or when slack storage of the multi-fiber breakout cannot be accommodated. The ferrule holder that is required for terminations is included with the QWIK-Fuse MPO termination kit and is also available separately.
